OUR ADVANTAGES

Experience in GLOBAL market

We have been in international market for more than 20 years and gained high reputation and accumulated valuable experience.

Always keep up with market changes, quickly match customer needs, while constantly strengthen the ability to deal with risks and policies in order for long-term & stable cooperation.

Quality Assurance

We have own lab with all sort of test equipment which are capable of raw material and end product inspection.

Stable Delivery

With annual output 15 million pcs and superior material control process, we can provide most reliable delivery for global customers.

OEM services

Base on solid cooperation with raw material company, we are able to define specific material for each layer of filter media and help customer to develop brand characteristics. We use best possible temperature resistance adhesive, ensure that filter products can be used in a variety of harsh environments from -40°C to 140°C.

Before-sale / After-sales service.

Any feedback can get first time reply and solution.
We value customer experience better than short-term benefits.
